MEMORANDUM FOR:

National Security Agency

25X1

SUBJECT: SWR Addressee Request

1. OSWR requests NSA's permission to add the House Permanent Select Committee for Intelligence (HPSCI) and the Senate Select Committee for Intelligence (SSCI) to the Science and Weapons Review (SWR) Distribution A list. (The SWR carries three different distributions: 1) CIA Internal Use Only; 2) Distribution A--Washington-area hardcopy recipients; and 3) six wire addressee groups for electronic dissemination. A SWR article may carry one or more of these disseminations depending upon the sensitivity of the information.)

25X1

2. HPSCI and SSCI will be given the same treatment as other Distribution A addressees in that NSA may rule that some sensitive ORCON/ORCON GAMMA SWRs be CIA Internal Use Only. However, copies of the SWR will not be retained by them as do other Distribution A addressees, and will be delivered to and retrieved from HPSCI and SSCI the same day.

25X1

3. For your information, I have spoken to  Chief, AO55, about this subject. Though I expect final approval from you, please check with her for more information. As OSWR is anxious to get the SWR to HPSCI and SSCI, I would appreciate your decision by COB 1 November 1988.
